PROFESSIONAL SUMMARY

Android Developer with 3+ years of experience, specializing in frontend development using Jetpack Compose, Kotlin, and MVVM architecture. Skilled in building modern, high-performance apps with strong UI/UX focus, seamless navigation, and scalable architecture. Experienced in integrating RESTful APIs and backend technologies like Firebase, MongoDB, and Ktor, delivering user-friendly and efficient mobile solutions.

SKILLS

Frontend Skills (Primary): Jetpack Compose, Kotlin, XML, Android SDK, MVVM Architecture, Navigation, Lifecycle Management, RESTful APIs, Retrofit, OkHttp, JSON, Testing, ViewModels

Other Skills (Secondary): Firebase, MongoDB, SQLite, Room Database, Ktor Framework, API Development, Clean Architecture, Encrypted Data Storage

Tools & Technologies: Android Studio, GitHub, Debugging, Emulator, Libraries, Third-party SDKs, Shared Preferences, Version Control

Soft Skills: Teamwork, Problem Solving, Communication Skills

Languages: English (Fluent), Hindi (Native)

WORK EXPERIENCE

Passionate Infotech (Android Developer)

Jul 2026 – Sep 2026

Developed 10+ Android apps, including a Smart Home Launcher with multiple built-in apps and a feature-rich web browser with smart browsing and privacy features.

Appnova Infotech (Android Developer)

Jul 2025 – Jun 2026

Co-founded and led Android projects, developing high-performance applications, managing client requirements, and delivering end-to-end solutions. Led a small development team focused on building, optimizing, and maintaining Android products.

Bazaar Setu (Android Developer)

Feb 2025 – Jun 2025

Worked as a Full-Stack Android App Developer, developing the Android frontend with Jetpack Compose, XML, and Kotlin, and building the backend with Ktor and MongoDB, including API development and data management.

Freelancer (Android Developer)

Feb 2023 – Jan 2025

Developed and delivered multiple Android applications for Indian and international clients.

PROJECTS

Bazaar Setu App

- A production-grade B2C marketplace app rated 4.9 on Google Play with thousands of downloads.
- Built complete UI using Jetpack Compose and Kotlin following MVVM architecture.
- Created secure and scalable backend APIs using Ktor and MongoDB with token-based authentication.
- Managed Room DB, Repository, and ViewModel layers to ensure responsiveness and reliability.

Weather Forecast

- Developed an Android app that provides real-time weather updates using the OpenWeatherMap API.
- Implemented dynamic backgrounds, intuitive search features, and Lottie animations for a visually engaging experience.
- Built with Kotlin and XML in Android Studio.

News App

- Designed an Android application that aggregates and categorizes real-time news from various sources using a News API.
- Implemented ViewPager with categorized tabs (Technology, Education, etc.) for smooth navigation.
- Built with Kotlin and XML using Fragments and TableLayout.

Shopping App

- Developed a feature-rich e-commerce app where users can browse and shop, and vendors can list their products.
- Implemented MVVM architecture, secure token-based authentication, and encrypted data storage.
- Utilized Jetpack Compose, Ktor backend, MongoDB, and Retrofit for a seamless user experience.

Vegetables Price Tracker App

- Created an app providing real-time price updates for vegetables and fruits using Firebase Realtime Database.
- Designed an optimized UI with smooth scrolling and an engaging splash screen.
- Built with Kotlin and XML for high performance and efficiency.

CERTIFICATIONS & ACHIEVEMENTS

- Kotlin for Android Developers — JetBrains Academy
- Android Basics with Compose — Google
- RS-CIT Certificate — RKCL, Vardhaman Mahaveer Open University
- Google Play Store Listing Certificate — Google Play Academy

EDUCATION

Bachelor of Technology — Computer Science Engineering

Jaipur National University, Jaipur, Rajasthan 302017

Apna College — Android App Development Courses

Self-taught in programming by actively solving coding challenges and working on personal projects.

AVAILABILITY

Immediate | Open to Remote, On-site | Focus: Front-End Android Development | Secondary: Backend with Kotlin
